Liquid Gas for your home

The Government's Clean Growth Strategy has made it clear that it wants to reduce carbon emissions from heating off grid homes that currently use oil for heating. BEIS (Department for Business, Energy & Industrial Strategy) aim to phase out the installation of high carbon fossil fuel (kerosene) heating in new & existing homes currently off the gas grid, by 2025. Liquid gas is the lowest carbon conventional fuel available now, that can provide an immediate, expedient and cost effective energy solution.

Liquid Gas is a low carbon alternative to conventional fossil fuels

- ✓ Liquid Gas omits 12% less CO₂ than Oil
- ✓ Heating oil is 17% more carbon intensive than LPG
- ✓ Liquid Gas emits no black carbon, a major contributor to climate change
- ✓ Liquid Gas installation is significantly cheaper than oil
- ✓ New Liquid gas boilers can be up to half the cost of a new oil boiler to replace
- ✓ Tank maintenance is our concern – not yours as with oil
- ✓ Much reduced risk of fuel theft when compared to oil
- ✓ Much less run outs than oil – all ordering is on our automatic top-up basis

All the benefits of mains gas – off the mains

- Heating and hot water on demand
- Cooking with a living flame
- Gas fires
- AGA / Range Cookers
- Remote monitoring of tanks means supplies are topped up as needed
- Tanks are viewed and maintained by us with every fill.

The process

Contact us to discuss switching from oil to Liquid Gas with a member of our JGas team

Our Services team will help you arrange the removal of your old oil boiler and fit a new Liquid Gas one

We'll remove your oil tank and fit your agreed Liquid Gas solution

Storage options

Underground

Leaving your garden with unspoiled views and your garden space at a maximum

Above Ground

Needing only a concrete plinth to sit on, a tank can be sited to maximize access and minimise inconvenience

Cylinders

Where space is limited, our 2 pack or 4 pack of 47kg Propane Cylinders provide a compact solution

Why JGas?

JGas have been keeping homes warm since 1983, distributing Liquid Gas to domestic and business customers across Scotland and parts of England.

As a local independent company, JGas offer a quality service based on reputation and trust, safety and value for money.
